**DETAILED ACTION**

***Election/Restrictions***

1. Applicant's election without traverse of group II in the reply filed on 10/6/06 is acknowledged.

***Claim Objections***

2. Claims 11-14 and 21-26 are objected to because of the following informalities:  
Claim 11, line 14, before "activity" insert - - an - -.  
Claim 11, lines 17 and 18, delete "activity identified" and insert - - identified activity - -.  
Claim 26, line 13, before "activity" insert - - an - -.  
Claim 26, line 17, delete "activity identified" and insert - - identified activity - -.  
Appropriate correction is required.

***Claim Rejections - 35 USC § 112***

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:  
  
The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.  
  
Claims 11-14 and 21-26 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 11 and 26 recites the limitation "the interceptors" and "the state information" in line 14. There is insufficient antecedent basis for these limitations in the claims.

***Claim Rejections - 35 USC § 101***

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 11-14 and 21-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

The claims fail to provide a tangible result, and there must be a practical application, by either 1) transforming (physical thing) or 2) by having the FINAL RESULT (not the steps) achieve or produce a useful (specific, substantial, AND credible), concrete (substantially repeatable/non-unpredictable), AND tangible (real world/non-abstract) result.

A claim that is so broad that it reads on both statutory and non-statutory subject matter, must be amended. If the specification discloses a practical application but the claim is broader than the disclosure such that it does not require the practical application, then the claim must be amended. A claim that recites a computer that solely calculates a mathematical formula is not statutory.

As per claims 11 and 26, the result of the claims is manipulating instructions and manipulating instruction leads to no practical application. Therefore, claims 11 and 26

fail to establish a tangible result. Also, claims 12-14 and 21-25 fail to establish tangible results. Therefore, claims 11-14 and 21-26 are directed to non-statutory subject matter.
